(57) Abstract :

The present invention discloses an automatic footrest assembly (100) for two wheeler (200), comprises of a pressure plate (110) mounted on the lower surface of a pillion rider's saddle (102); plurality of load cells (120) mounted on said pressure plate (110) for accurately sensing the weight on the pillion rider's saddle (102); an amplifier (130) for amplifying signals received from plurality of load cells (120); a micro-controller (140) for deploying/retracting a pair of footrests (160) based on the weight on the pillion rider's saddle (102); a drive unit (150) provided on each side (left and right) of the two wheeler (200) for deploying/retracting a footrest (160); a frame (106) securely mounted on each side (left and right) of the two wheeler (100) for mounting said drive unit (150) and the footrest (160); and a vehicle's battery (170) to power the automatic footrest assembly (100).
